

BALTHAZAR

DISPLAYS

Slow jumping hours and sweeping minutes: twin dials on the chest feature MB&F's signature numerals and respectively display hours and minutes.

Retrograde second display in eyes: real apogee in each eye scan over 20-second intervals and indicate seconds.

Power reserve indicator: dial at the belly providing intuitive view of remaining energy.
Double hemisphere moon phase indicator on the Dark side chest.

MOVEMENT

LTpile in-house designed and manufactured movement.
Inertial shock protection system.

Power reserve: 35 days.

Manual-winding: a double socket key integrated into the shield sets time and winds movement.

405 components and 62 jewels.

DIMENSIONS AND WEIGHT

Size: 294 tall x 238.2 wide x 124 mm (boot incl).
Weight: 8.2 kg.

HIPS

Rotate on precision ball bearings with spring click to indicate and hold at resting positions.

SHOULDERS / ARMS

Pivot at arms/shoulders, rotation at the elbows, pivot lower arms with spring locking system. On each hand, two fingers cross into the other three so that the hands can clasp.
