

SHERMAN

THE LITTLE ROBOT WITH A BIG SUPERPOWER

Sherman's mechanics are based on a L'Epée 1839 in-line eight-day movement, which ensures that the friendly tank-treaded table clock can display the correct time on his chest for more than a week before requiring rewinding.

But Sherman is not simply a clock inside a robot, but an integral and holistic robot-clock. The mainspring barrel bridge extends down to support his tracks, movement spacers act as shoulders for the arms, and his eyes are bolt heads supporting the regulator. The movement plates and bridges of the clock

also make up the skeleton and body of the robot. And Sherman has a superpower! In fact, Sherman really only does two things, but he does both extremely well. Sherman tells the time. And Sherman makes people smile, which is probably the world's most useful and (emotionally) valuable complication.

TECHNICAL SPECIFICATIONS

LIMITED EDITION

200 pcs each for reference 76.6001/041 and 76.6001/101
50 pcs each for reference 76.6001/051 and 76.6001/151

FUNCTIONS

Hours and minutes displayed on Sherman's chest

MOVEMENT

Cal. 1853 SK2

FINISHINGS

Geneva waves, Mirror polish surfaces and sun satined finishings

JEWELS

17

DIMENSIONS

143 mm tall x 109 mm wide x 80 mm deep

MATERIALS

76.6001/041: Gold-plated with palladium-plated going train (gearing) and nickel-plated balance wheel

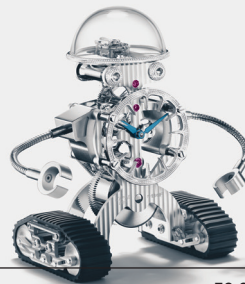

76.6001/101: Palladium-plated (silver colour)

76.6001/051 & 76.6001/151: Fully gold-plated body and movement (ref. 051), or palladium-plated (ref. 151), with gem-set with 735 high quality VVS diamonds around the eyes, hour markers and head

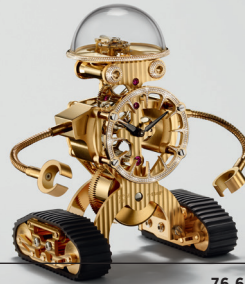

POWER RESERVE

8-day

Double depth design key to set time and wind movement (on the back of the clock)

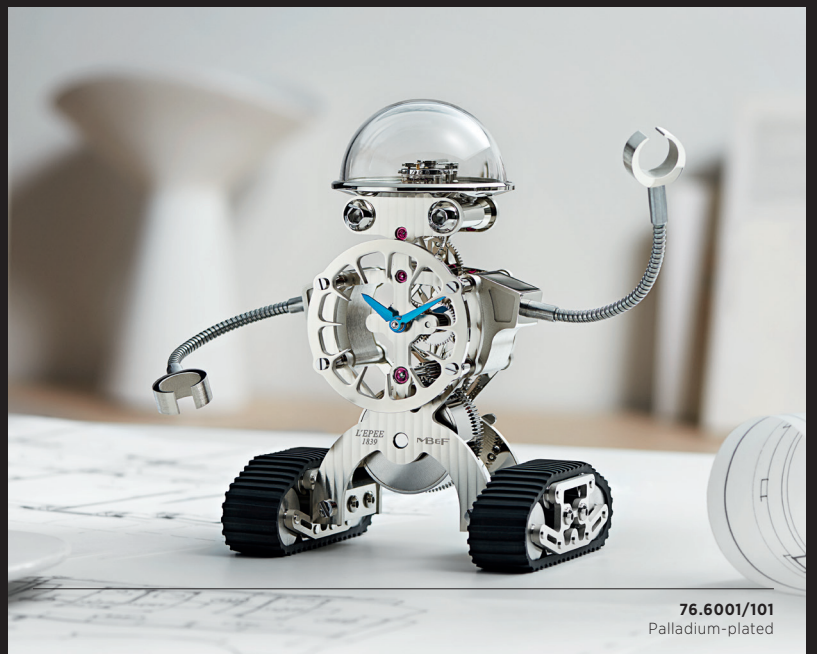

76.6001/151
Palladium-plated and Diamond set

76.6001/051
Gold-plated and Diamond set

76.6001/041
Gold-plated

76.6001/101
Palladium-plated
